Dear Sir or Madam,

Teaching English language in a country where it is not spoken as the first or second language is always challenging for English teachers. We search for interesting methods that activate students' wish to study and develop all their language skills. Using magazines is one of the most powerful activities and brings real-life sources to language learning.

In connection with your kind gift to our school we would like to gratefully thank you for such an opportunity to extend our access to the variety of subjects and topics that are covered in the issues of those magazines.

We use various types of mass media in the classrooms altogether in our daily activities, but being donated such a wide variety and number of issues is making all our students easily accessed to a great learning environment.

Thank you for your contribution to our interesting work once again.

Yours faithfully,

RNDr. Janka Hozová

Let us, on behalf of the Church Grammar School of St. Mikuláš in Stará Ľubovňa and, last but not least, on behalf of the students, expressed their sincere thanks for the help you provided us.

We value people who take even the smallest as part of our society, they understand their difficulties, joys, dreams and hidden desires, which not everyone understands and supports. Our aim is to provide equipment for all students in our school so that they can deepen their knowledge and skills and make meaningful use of time.

We therefore express one, big THANK YOU!

Thanks to your sponsorship, all students will also have access to materials that are helpful in teaching English at school. We are extremely happy and grateful for your willingness, love and effort to help.

On behalf of all, we wish you much success in your future work as well as in your personal life.

Your sincerely,

Mgr. Pavol Chmeliar
